Living Wall Air Purifiers

Living Wall Air Purifiers:

We design and build our own air diagnostic hardware which helps target specific chemicals and VOC's as well as our own automotive systems bespoke to each site specific application.

Our products reduce VOC's and increase Oxygen levels.

A hospital grade Hepa-Filter is included. This removes upto 99.9% of dust particles and will help remove virus bacteria molecules from the air.

Our systems can monitor and adjust: Temp and Humidity, CO₂, NH₃, Nox, HCHO, Benzene, Dust particles, CO, TVOC and O₂.

PRICES

Prices are dependent on a variety of options that are available. Please contact us for a quote.
